

**Purpose-driven commercial
cleaning and integrated services**

scsgroup.com.au | scsindigenous.com.au

Purpose-driven commercial cleaning and integrated services

Why purpose-driven?

Because our purpose goes beyond delivering top-tier commercial cleaning and integrated services.

We exist to create meaningful, purpose-driven impact, empowering communities through partnerships that are genuine, enduring, and grounded in real outcomes.

What we do delivers excellence; how we do it creates trust and lasting value for people, partners and communities.

Vision

To set the benchmark for purpose-driven commercial cleaning and integrated services, delivering the highest standard of operational excellence, trusted partnerships and measurable social impact, establishing a top-tier organisation where performance, purpose and community impact are seamlessly integrated.

Purpose

To deliver purpose-driven services that create lasting value, empowering communities, strengthening partnerships and generating meaningful, measurable impact for the organisations and people we serve.

Great Place to Work – 3 years in a row

From the Managing Director

*We stay close to
our operations.
We back our people.
We deliver what
we commit to.*

More than 25 years ago, I began working in this industry on site, learning firsthand what it takes to deliver consistently, solve problems quickly and build trust the right way.

That experience has shaped how we have built this business.

In 2009, Smart Cleaning Solutions started with a small group of clients in Victoria and a simple belief – we could do this better. Better for clients. Better for our people. Better for the industry.

As our clients expanded, we expanded with them. What began as a commercial cleaning company has grown into SCS Group, an integrated facilities partner supporting large and multi-site organisations across Australia and New Zealand.

Commercial cleaning remains our core discipline. It sets the standard for how we operate and how we measure performance.

Today, we deliver far more than cleaning. Through experienced operational leadership, structured governance and digital platforms such as Smart Connect, we provide integrated services across hygiene, waste, pest, grounds and maintenance under one accountable framework.

While the business has grown, our foundations remain the same.

We are a people-led organisation. Many of our leaders have come through the business. We invest in training, systems and leadership because sustainable growth requires discipline.

Through SCS Indigenous, we focus on creating real opportunity by removing barriers and opening pathways into meaningful work. It goes beyond employment – combining work, training and support in a way that brings purpose and performance together in how we operate every day.

We stay close to our operations.
We back our people.
We deliver what we commit to.

That is SCS Group.

Nicholas Pastras

NICHOLAS PASTRAS
MANAGING DIRECTOR (SCS GROUP)
CO-FOUNDER / DIRECTOR (SCSi)

Our story

SCS Group grew from frontline experience. That foundation continues to shape how we operate today.

Facilities services succeed when three elements are aligned:

- Clear responsibility
- Strong supervision
- Open communication

Everything we do across Australia and New Zealand reflects this operational discipline.

As our clients' facilities have grown in scale and complexity, our organisational structure has evolved alongside them. A structured operational model, supported by experienced leadership and certified systems, allows us to deliver consistently at scale.

At SCS Group, growth and governance are not separate priorities. We strengthen both together.

What drives us

We focus on three things:

1. Getting better
We continuously improve how services are delivered.
2. Developing people
We create real pathways for our teams to grow.
3. Delivering impact
For our clients, our people and the communities we support.

Operationally, our approach remains practical and disciplined.

- We stay close to operations
- We strengthen systems continuously
- We address challenges early

Facilities services are often unseen, yet they play a critical role in how organisations operate every day. That responsibility continues to shape how we lead.

From the Chief Executive Officer

With the strong operational foundation of the business established, our vision is clear – to continue building a high-performing, nationally respected organisation that sets the benchmark for excellence in service, innovation and sustainable growth.

Central to achieving this vision is the strength of our leadership team.

We are not simply focused on revenue growth. We are committed to building a business that delivers consistent value to our clients, creates meaningful career opportunities for our people, fosters a strong working culture, and operates with discipline, accountability and purpose.

Our ambition is to continue evolving the business, underpinned by a relentless focus on operational excellence, strong financial management and a differentiated market position built on quality and trust.

Central to achieving this vision is the strength of our leadership team.

Leading our growth agenda is our General Manager – Sales, Michael Girgis, who brings energy, structure and a results-driven approach to expanding our market presence and building a high-performing sales culture.

Our General Manager – Operations, Adam Browning, is responsible for ensuring we deliver on every promise we make. His focus on consistency, efficiency and service excellence is critical to retaining clients and protecting our brand.

Overseeing our financial discipline is Chief Financial Officer, Tony Phan, who ensures strong governance, profitability and the financial foundations required to support our growth ambitions.

Driving our technology and innovation roadmap is Chief Information Officer, Liam McKie, who is focused on modernising and strengthening our systems, leveraging data and enabling more scalable ways of working across the business.

Together, this leadership team represents the capability, alignment and ambition required to support the next phase of our growth.

Partner with purpose

Partners in capability. Driven by culture.

SCS Indigenous (SCSi) unites Indigenous ownership with national capability. Co-founded by Scott McCartney and Nicholas Pastras, and operating in strategic partnership with SCS Group, we deliver commercial cleaning and integrated facility services across Australia and New Zealand, embedding cultural integrity, community focus, and purpose into every aspect of our service.

Drawing on decades of combined experience, the partnership brings together national operational capability with Indigenous ownership and leadership. Our foundation rests on an unwavering commitment to service excellence, sustainable outcomes, and the empowerment of Indigenous communities through meaningful economic participation.

Creating opportunity through connection, support and belief

The Bandum Fund was established by the founders of SCS Indigenous to help remove financial barriers that can prevent Aboriginal people from pursuing opportunities in education, sport, the arts, leadership and professional development.

Named after the Bunurong word Bandum – meaning to come together – the Fund reflects a belief that talent exists everywhere, but opportunity does not always come equally.

Supported by SCS Group and SCS Indigenous, the Fund invests directly into people, pathways and experiences that empower individuals to grow, build confidence and pursue their goals.

From supporting young athletes and emerging artists to helping individuals access education, mentoring and career development opportunities, the Fund is focused on creating meaningful, long-term impact through practical support and genuine community connection.

Partner with purpose

Our service delivery commitment

Reliability and excellence define our operational approach. SCS Indigenous is committed to delivering superior outcomes through:

- Tailored cleaning and facility management programs designed specifically for each client's unique needs.
- Transparent, proactive communication channels and fully accountable service delivery.
- Robust quality assurance frameworks driven by rigorous standards and continuous improvement methodologies.

Our objective is to consistently exceed client expectations through reliable, adaptable, and forward-thinking service delivery, while actively driving measurable social value and local impact.

PARTNER *with purpose*

Organisations we partner with:

Our promise is built on four foundational pillars:

Uncompromising quality:

Delivering consistently high-calibre services through continuous improvement and an unwavering pursuit of excellence.

Authentic community partnership:

Engaging deeply with local communities through respect, collaboration, and shared initiatives that foster mutual growth.

Cultural integrity & empowerment:

Weaving Aboriginal perspectives and values into contemporary business practices, ensuring cultural identity is honoured and amplified.

Sustainable & meaningful impact:

Creating a positive legacy – socially, economically, and environmentally – by championing Indigenous-led solutions and responsible practices for a better shared future.

SCS Indigenous sets new benchmarks by building enduring trust, nurturing talent, and delivering outcomes that benefit all stakeholders.

Why partner with SCS Group

There are many cleaning companies

What makes us different is not what we say.
It is how we operate.

It comes down to three things:

- Our people
- Our structure
- Our willingness to evolve

A true integrated service partner

Our service goes beyond cleaning

Commercial cleaning is our core discipline.
It is what we know best. Everything we deliver
stems from maintaining safe, compliant and
well-presented environments.

For many clients, we coordinate integrated services
including hygiene, waste, pest, grounds and
maintenance through self-delivery,
structured partnerships and clear governance.

But we never lose sight of what underpins
performance:

- Clear responsibility
- Strong supervision
- Reliable standards

That applies to every site.

People first, always

**Our people are committed. Experienced.
Accountable.**

We operate in real environments. Issues can arise.
What matters is how we respond.

- We coach
- We support
- We fix
- We improve

We stay close to our teams and the work they deliver.

Clients feel heard.
Teams feel supported.
Problems get solved.

You will feel that from the ground up, right through to
the Managing Director.

Designed around you

**Every engagement starts with understanding
how your facility actually operates.**

- Operating hours
- Risk profile
- Compliance requirements
- Customer flow

We do not impose a template. We design a service
model around you.

Many of our larger clients started with a single site.
A leap of faith. Performance built trust. Trust drove
expansion.

Expansion-led to long-term partnerships.
We grow with our clients.

Structure that supports scale

Growth without infrastructure leads to inconsistency

As we have expanded across Australia and New Zealand, we have invested in governance, digital platforms, management layers and compliance systems, so growth never outpaced our ability to deliver consistently.

- Triple ISO certification
- Layered operational management
- Dedicated HR and safety frameworks
- Digital reporting and client visibility through Smart Connect

Through SCS Indigenous, we extend this structure into measurable social impact – creating employment pathways and strengthening communities while maintaining commercial discipline.

We invest in people before we invest in work.

That is how we scale sustainably.

Innovation that improves outcomes

We look for ways to improve how services are delivered

We invest in smarter equipment, robotics, digital reporting, client dashboards, time and attendance verification and real-time quality audits.

Technology is not there to replace people.

- It enhances transparency
- It improves accountability
- It strengthens performance

If something can be improved, we explore it.

If a solution does not exist, we work until one does.

What partnership delivers

Organisations partner with SCS Group because we deliver more than cleaning

We deliver:

- Consistent performance
- Experienced leadership
- Practical systems that work on site
- Clear lines of responsibility
- Measurable standards
- Scalable infrastructure

We combine the capability of a large organisation with the responsiveness of a business that stays close to its operations.

We operate responsibly. Through ESG commitments and SCS Indigenous, social and environmental impact is embedded in how we deliver.

We are commercially disciplined. Operationally capable. Purpose driven.

Commercial cleaning and integrated services for large and multi-site facilities

Commercial cleaning is the foundation of what we do

Across offices, industrial sites, retail environments, education facilities and hospitality venues, SCS Group delivers structured cleaning services that maintain safe, compliant and well-presented environments every day.

Delivering consistent outcomes across multiple sites requires more than labour. It requires supervision, clear accountability and operational systems that support reliable service delivery.

That same operational discipline underpins every service we provide

Many clients also require additional facility support services alongside cleaning. Through SCS Group's integrated service model, we coordinate services such as hygiene programs, waste management and recycling, pest control, grounds maintenance and minor facility maintenance under a single operational framework.

These services are delivered either directly by SCS Group or through carefully selected specialist partners, all managed through our governance, reporting and operational leadership structure. This ensures consistent standards, clear communication and a single point of accountability across every location.

Alongside scheduled services, SCS Group also delivers periodical and ad-hoc works that support the ongoing presentation, compliance and maintenance of client facilities. From builders cleans and deep cleaning programs to high-access works, window cleaning and specialised surface treatments, these services allow organisations to respond to operational changes while maintaining high standards across their sites.

Together, these capabilities allow SCS Group to support organisations ranging from single-site operations through to complex multi-site portfolios across Australia and New Zealand.

Services

Industry experience across diverse operating environments

Facilities operate differently across every sector, shaping how services are delivered

Operating hours, regulatory obligations, customer expectations and risk profiles vary significantly between environments such as healthcare, education, hospitality, retail, industrial facilities and commercial offices.

Delivering consistent cleaning services across these environments requires more than a standard approach. It requires an understanding of how each sector operates.

Over many years, SCS Group has developed deep sector knowledge working with organisations across a wide range of industries throughout Australia and New Zealand. Many of our clients operate multi-site portfolios with varied compliance requirements and geographically dispersed locations, requiring consistent service standards supported by structured operational management.

Our teams understand the operational realities of the sectors we support. From high-traffic public environments and sensitive healthcare settings to complex industrial facilities and customer-facing hospitality venues, we adapt our cleaning programs to align with each organisation's operating model, compliance obligations and service expectations.

This experience allows SCS Group to deliver practical, effective cleaning services that support safe, compliant and well-presented environments across every location.

Governance and systems

Delivery is underpinned by a Triple ISO accredited Integrated Management System (ISO 9001, ISO 14001 and ISO 45001), ensuring structured quality, safety and environmental performance.

A layered governance model – spanning executive oversight, state operations and on-site supervision – provides clear accountability and consistent service standards.

This is supported by technology-enabled transparency through real-time attendance tracking, digital work order management, audit reporting and performance dashboards

Sectors we support

Accommodation

Aged care & community living

Commercial and office

Education

Fitness & leisure

Food manufacturing

Transport & logistics

Our valued partners

Organisations that trust us to deliver, and continue to grow with us over time

The organisations shown here represent long-standing relationships built on consistent performance and day-to-day reliability. They operate across a range of sectors and environments, but share a common expectation – services delivered as agreed, supported by clear communication and accountability on site.

Many of these partnerships have grown over time. What often begins as a single engagement expands across multiple sites as trust is established and standards are maintained. This is supported by a stable workforce, with a 90.3% employee retention rate and strong engagement reflected in being twice recognised as a Great Place to Work – three years in a row.

Across more than 1,950 sites, our teams deliver commercial cleaning and integrated services through a structured model that prioritises supervision, governance and consistency.

These partnerships reflect a shared focus on quality, safety and presentation, and a practical approach to maintaining well-managed environments.

Client partnerships in action

Sand Hill Road – Waterside Hotel Melbourne

Hospitality venue reopening and presentation support

SCS Group supported the reopening of the historic Waterside Hotel in Melbourne, providing specialist cleaning services during the final stages of the redevelopment and ongoing hospitality cleaning once the venue became operational.

Working alongside Sand Hill Road's management and project teams, SCS Group coordinated cleaning during the final fit-out phase to ensure the venue was presented to the required standard ahead of opening, transitioning into daily operational cleaning across front-of-house areas, kitchens and public spaces.

The project required coordination, responsiveness and attention to detail across all seven levels, supporting a premium hospitality environment from day one.

This partnership demonstrates SCS Group's ability to support clients from project delivery through to ongoing operations, maintaining consistent standards in high-profile environments.

"SCS Group has consistently delivered reliable, high-quality cleaning services across our venues. Their team understands the operational pressures of hospitality and works seamlessly with our staff to maintain exceptional presentation standards."

**Operations Manager
Sand Hill Road**

PACCAR Australia

Industrial manufacturing partnership

SCS Group delivers industrial cleaning and integrated waste management services for PACCAR Australia, the manufacturer of Kenworth and DAF trucks.

Initially appointed in July 2024, the partnership has expanded across multiple facilities, with SCS Group now providing cleaning, waste management and specialist services across PACCAR's manufacturing operations.

The SCS team operates six-day shift rosters integrated with PACCAR's safety and operational frameworks, supporting production readiness across offices, amenities and critical manufacturing areas including paint booths.

A recent expansion of specialist paint booth cleaning services reflects PACCAR's confidence in SCS Group's operational performance and reliability.

"SCS Group has become a trusted extension of our team. Their professionalism and proactive communication give us confidence that our sites are production-ready every day."

**Brent Nash
Facilities Manager, PACCAR Australia**

Reliable & professional

"At AMIGA Montessori, we operate 17 childcare centres across Victoria and South Australia, and the SCS Group team has been easy to work with, responsive, and proactive in ensuring everything runs smoothly."

Communication has been clear, and any questions or requests have been handled quickly, making the process very straightforward."

Sam Bavdek
Amiga Montessori

What our clients say

Melbourne Legacy

2 week ago

We have partnered with SCS Group for several years. They have delivered exceptional standards of cleaning in our building. The SCS team continue to be responsive to requests and agile in meeting our needs. Any feedback is addressed quickly and professionally. Their staff have even volunteered at some of our charitable events. We see SCS Group as more than a service provider – they are a genuine, trusted partner.

Arbel Givargis - Fundraising & Marketing Manager Melbourne Legacy

Kids on Gallaghers

1 month ago

This company has been great for our childcare centre. If we do have things that we want improved at all, they get on it straight away. There are managers overlooking the cleaners as well :)

Andrew Hume
Kids on Gallaghers

ALH

6 months ago

ALH Group has partnered with SCS Group for over ten years across multiple Australian states. Supporting more than 150 venues and 50+ accommodation sites, SCS has consistently delivered a professional, responsive and reliable service in a fast-paced environment. Their team is proactive, solution-focused and always looking to improve outcomes. SCS Group is a trusted national partner, and we engage them with confidence.

Peter Hogg - State Manager Vic/Tas
ALH Group Pty Ltd

Snap Fitness

2 months ago

I use SCS Services across three of my Snap Fitness gyms in Melbourne. Over the years, I've worked with several different cleaning companies, and hands down, SCS is the best I've used in my 20+ years in business. They are highly reliable and consistently maintain a high standard of cleanliness. What really sets them apart is that they send out their own inspectors regularly to ensure standards remain high and nothing is missed. Highly recommended.

Michael Motee
Snap Fitness

Ken Tsirigotis
National
Partnerships
Manager

ESG and Corporate Sustainability

Our ESG framework and corporate sustainability approach

Corporate sustainability at SCS Group is guided by our Environmental, Social and Governance (ESG) framework, which provides the structure through which our commitments are governed, delivered and continuously improved.

Together, ESG, Corporate Social Responsibility (CSR) partnerships and our Diversity, Equity and Inclusion (DEI) strategy ensure that sustainability at SCS Group is structured, measurable and led with accountability.

Our ESG framework defines how we manage environmental responsibility, social impact and governance across our operations. CSR partnerships enable us to deliver meaningful outcomes alongside trusted community organisations, while our SCS Together DEI Strategy strengthens inclusion, fairness and opportunity across our workforce and supply chain.

Our strategic intent

At SCS Group, and through our Indigenous-led division SCS Indigenous (SCSi), we believe commercial success goes hand in hand with community empowerment.

We support a diverse and interconnected cross-section of society, and our strength comes from unity, diversity and shared purpose. As a purpose-driven organisation, we focus on creating lasting community impact through a structured and accountable approach to corporate sustainability.

Our commitment is delivered through six core contribution areas that guide how we engage with partners and communities:

Nilanka Dharmasena
National Human
Resources
Manager

Social impact and inclusion – our people and communities Diversity, equity and inclusion (DEI)

People are at the centre of our sustainability approach. Through our SCS Together DEI Strategy, we are building a workplace where every individual feels valued, respected and empowered to thrive.

Our DEI priorities focus on representation, fairness, inclusion, leadership accountability and continuous improvement. These commitments are embedded across recruitment, training, career development, supplier relationships and leadership accountability, and are reviewed regularly to ensure meaningful progress.

“SCS Together represents unity, respect, and inclusion – the belief that when we stand together, we grow stronger together.”

ESG and Corporate Sustainability

Empowering community partnerships with purpose-driven impact (CSR)

We approach CSR partnerships as long-term, values-aligned relationships rather than one-off sponsorships.

Our partnerships are designed to create shared value – strengthening community outcomes while also supporting employee engagement, advocacy and organisational learning.

Partner	Mission Focus
	From Cancer prevention, support, and education to – advancing cancer research, prevention, and support.
	Removing financial barriers to support First Nations youth in accessing sporting pathways and reaching their full potential.
	Veteran wellbeing, housing and empowerment
	Providing financial, emotional, and social support to the partners and children of deceased or incapacitated veterans.
	Empowering young people and communities across Australia to create a more just, inclusive and sustainable world.
	Supporting people with disabilities, vulnerabilities, social challenges and their families.
	Empowering Aboriginal women and their communities.

Environmental sustainability in practice

Sustainable products, equipment and cleaning technologies

Our environmental commitments extend beyond policy and into the products, equipment and technologies used across our operations.

We prioritise solutions that reduce water, energy and chemical use, improve indoor environments, and support safer outcomes for our workforce and building occupants.

This includes energy-efficient equipment, low-moisture and microfibre systems, controlled chemical dosing, chemical-free technologies where appropriate, and environmentally preferred products aligned with recognised standards.

Environmental responsibility is delivered through day-to-day operational decisions.

“Maximising positive impact, minimising environmental footprint.”

Technology and environmental responsibility in practice

SCS Group integrates modern cleaning technologies to improve safety, efficiency and environmental performance across our operations.

These tools support our teams to deliver consistent outcomes while reducing chemical use, water consumption and manual handling risks. Where it makes sense, we prioritise solutions that reduce reliance on traditional chemicals without compromising hygiene or presentation standards.

Smart equipment and robotics

We enhance traditional cleaning methods through modern equipment and autonomous technologies, including robotic scrubbers and vacuums.

These systems automate routine, high-coverage tasks across large or high-traffic environments, allowing our teams to focus on detailed and high-touch cleaning activities.

The result is more consistent outcomes, safer working conditions and minimal disruption to occupants.

Reduced chemical and controlled systems

We adopt cleaning methods that reduce chemical reliance while maintaining high standards.

Technologies such as stabilised aqueous ozone convert tap water into an effective cleaning and disinfecting solution, reducing the need for conventional chemicals, storage and packaging.

Low-moisture methods, microfibre systems and dry steam further reduce environmental impact, while controlled dispensing systems ensure chemicals are applied accurately, safely and only where required.

Data-driven service delivery

Digital platforms and connected systems support a more responsive, demand-based service model.

Real-time data, service tracking and reporting allow cleaning activities to align with actual site conditions rather than fixed schedules.

This improves efficiency, reduces unnecessary activity and provides clients with clear visibility of service performance.

Technology supporting operational performance

At SCS Group, technology supports the delivery of consistent, accountable services across complex environments.

We invest in systems and tools that improve operational visibility, strengthen accountability and create efficiencies for both clients and operational teams.

Real-time reporting, workforce verification and integrated systems allow service delivery, performance outcomes and operational activity to be monitored across every site.

Digital documentation, online billing and integrated reporting streamline contract management and reduce administrative effort.

Smart Connect: Digital operations and client platform

At the centre of this ecosystem is Smart Connect, SCS Group's secure digital client portal.

Smart Connect brings together operational data, reporting, service requests and performance monitoring into a single platform, providing real-time visibility across every site.

Through the portal, clients can access operational information directly with SCS teams via a secure web interface from any device, including:

Service request ticketing

Log and track additional services

Time and attendance verification

Integrated with LinkSafe

Live quality audits

Monitor performance against KPIs

Commercial compliance records

Training, WWCC and certifications

Financial information

Invoice access and billing queries

Periodical cleaning calendar

Scheduled deep cleaning programs

Contract management documentation

Service specifications and reports

Robotics monitoring

Status of automated cleaning equipment

Operational teams update activities through mobile-enabled systems, ensuring task completion, inspections and service updates are reflected in real time.

This provides a single source of operational information, improving communication, transparency and collaboration between SCS and its clients.
